

## FACT SHEET #14

### Cattle Ramps

Cattle ramps are special walkways that enable cattle to get safely on and off cattle transportation such as cattle trucks. They are designed specifically to improve safety for both the animals and their handlers.

Expo-Trade has many options available from simple ramps to more advanced adjustable ramps that can be used in different situations and at varying heights. Considerable research has gone into the design and manufacture of these ramps. All our products conform to optimum width specifications for maximum efficiency and safety.
