

FACT SHEET #3

Live Animal Exports from Australia to Russia

The on-farm selection of suitable livestock, export preparation and quarantine from Australia, compliance and importing country protocol, shipment by sea and air, and insurance arrangements are all part of the package Expo-Trade will arrange for you in collaboration with Elders International Livestock Exports.

All our selection and export operations are conducted in accordance with world's best practice. Animal health and welfare is of primary importance to us, assuring the safe and acceptable condition of the live animals at delivery.

We can supply cattle, sheep and goats, and assist with the development of all associated logistics and infrastructure. Expo-Trade is a joint-venturer in a Russian infrastructure facility that can receive ships with up to four thousand head of live animals. We are also part-owners of two quarantine stations within easy reach of the ports at Novorossiysk and Ust-Lug and have our own system of animal transportation within Russia.
